

A grave receives a face

My uncle Hans Georg Rudies heavily was wounded 1940 in an air attack in the room Stavanger and is short time later in the hospital deceased.

My grandmother received a photo of the grave of its son Hans Georg of the German „Kriegsgräberfuersorge“ (war grave care association) years later. This grave is on the soldier cemetery Havstein in Trondheim.

As I once the name of my uncle into a search engine arrived input I on the HP of the cemetery in Trondheim. In a name list of fallen soldiers, my uncle Hans Rudies stood.

I input in December 2007 the name "Hans Rudies" again in a search engine and to my large surprise, I bumped into following picture:

The grave shown here, is the original, which was designed directly after death of my uncle. Here a young person died. For what also always, at least it received an orderly grave. How many victims of the war received no grave?

The father of the fallen is missed in the same war, got also he a correct grave?
